SUBJECT: GENERAL ANNOUNCEMENT

We hereby wish to inform you that:

Confidence Petroleum India Limited through its Associate Company CONFIDENCE FUTURISTIC ENERGETECH LIMITED (formerly known as GLOBE INDUSTRIAL RESOURCES LIMITED) has launched Composite LPG Gas Cylinders on the 02nd of November, 2017. The Composite Cylinders will be available in attractive designs and extremely light weight in convenient sizes of 2, 5, 10 and 22 kg. Other highlighting features include the cylinders having a transparent body making the quantity of gas visible inside. This will ensure appropriate volume supplied.

The Composite Cylinders having found popularity in the Western Countries, are now being made available to the Indian consumers and the Company expects market dominance in the near future.

This is for your information and record.

Thanking You,
Yours truly,

For Confidence Petroleum India Limited

Confidence Group launches composite gas cylinders

■ Business Bureau

CITY-BASED Confidence Group on Thursday launched Go Gas Elite Composite gas cylinders at a glittering ceremony held here in the city. Nitin Khara, Chairman, of the Group, Elesh Khara, Director, and Vimal Parwal, President launched the innovative product which is expected to revolutionise consumption of LPG in the country.

Confidence Group also launched a new company -- Confidence Futuristic Energetic Limited, for making composite LPG gas cylinders. The cylinders will be available in attractive designs weighing in convenient sizes of 2, 5, 10 and 22 kg.

Shedding light on the new venture, Nitin Khara said, the new composite gas cylinder will provide safety, ease of handling and transparency to the LPG consumers. "Introduction of composite gas cylinders in Indian market is a revolutionary step which is bound to transform

Nitin Khara, Chairman of Confidence Group and others at the launching ceremony on Thursday.

Indian kitchens. Population of our country is around 125 crore and around 75 crore people are LPG consumers. However more than 70 crore people do not know what is the weight of LPG gas cylinder supplied to them at home. They are also unaware about how much gas they should

be getting. However, the new cylinders are different from the conventional iron body cylinders being used for over 65 years," he said. Firstly, the composite gas cylinders are extremely light weight. They can be easily picked up even by women and children. Secondly, these cylinders have

transparent body due to which the amount of gas inside the cylinders is visible. This ensures that right quantity of gas is supplied and the amount of gas available in the cylinder at all times can be easily checked. Hence from now onwards there is no more worry of less gas being supplied or even

of gas theft. Thirdly, the speciality is that these cylinders are 'Blast proof' so there is no danger of loss of life and property thus making them extremely safe to use.

Handling a 30 kg cylinder is difficult for many men or a woman, as per Medical Science it is not advisable to pick more than 23 kg weight as it may damage the spine. 2 and 5 kg composite gas cylinders will be extremely convenient for use in hostels, hospitals, and can be carried to a picnic or outdoor parties.

"These cylinders will be made available to consumers immediately without any formalities and we will ensure immediate refills as well," Nitin Khara said.

Vimal Parwal while speaking on the occasion said, 70 crore people use LPG and all these people are expected to switch to using composite cylinders within the next few years seeing the advantages offered by them.

Highlighting the features, the Khara claimed that the new cylinders would dominate the Indian

markets. These cylinders are extremely popular in Japan, Australia and European countries and have been in use for many years.

The group is planning to launch all the major cities in India in the next three months.

Rajesh Nair, General Manager (Marketing) while speaking on the occasion said even though he is concerned about the safety and security of his family, he will definitely start using the light weight cylinders.

Confidence Group is the biggest private LPG cylinder manufacturer and LPG bottler. It runs more than 110 stations in India, 58 Bottling Plants, 15 cylinder manufacturing units in India. The new cylinders were launched in the presence of the group Sarvejitendra Jain, Satish Chandra P. Murty, Nirali Distributor of Nagpur, Soni, staff of the company and other distinguished guests.
